Dioscar Rodriguez

Full-Stack Software Engineer

Cicero, NY | (347) 200-9415
dioscarr@gmail.com | github.com/dioscarr

Bachelor's in Computer Information Systems
New York City College of Technology | 2014

PROFILE

Full-stack software engineer with 12+ years of experience building enterprise web applications, modernizing legacy systems, and delivering database-backed business workflows. Core strengths in C#, .NET, Blazor, React, and SQL Server, with hands-on work in role-based access, API integrations, and AI-assisted development.

PROFESSIONAL EXPERIENCE

Programmer

Jul 2020 - Present

McNeil and Company

- Modernize an enterprise e-learning platform serving approximately **108,000 users**, migrating ASP.NET WebForms / VB.NET functionality to **C#, .NET, and Blazor** while preserving business rules and learning records.
- Migrate Sybase data and inline SQL into **SQL Server**, stored procedures, table-valued functions, Entity Framework, and reusable C# service layers.
- Build role-scoped workflows for students, officers, and administrators, including assignments, user management, course history, certificates, documents, and reporting.
- Integrate **xAPI / Tin Can** content and an on-premises Veracity learning record store; translate learning statements into progress, quiz results, and completion records.
- Implement authentication and authorization with **Auth0**, claims, and role-based policies; support real-time notifications with **SignalR** and application diagnostics with Serilog and Seq.
- Develop customer portal workflows for insureds, brokers, carriers, and administrators, including documents, billing views, user management, and reusable Tailwind theme tokens.

Lead Software Engineer

May 2016 - Mar 2020

Third Mind Inc

- Led full-stack development of web, CRM, extranet, and document automation applications using **ASP.NET Core, React, Entity Framework, and SQL Server**.
- Developed contract generation with **Open XML** and template variable replacement, converting HTML content into Word documents.
- Modernized legacy interfaces with React and AngularJS; maintained school CRM workflows and implemented authentication improvements across client applications.

Dioscar Rodriguez

Experience, selected projects & technical skills

EARLIER EXPERIENCE

Full Stack Web Developer

Oct 2015 - May 2016

Clever Design

- Developed and deployed responsive ASP.NET / C# websites and CMS features using SQL Server, JavaScript, AJAX, and Bootstrap; built search and autosuggestion workflows.
- Tested and remediated SQL injection and cross-site scripting issues; guided clients in maintaining website content.

Web Developer

Jul 2014 - Oct 2015

Pointer Security

- Built ASP.NET MVC5 applications with C#, Entity Framework, and SQL Server; contributed to application architecture, business logic, and database design.
- Implemented real-time notifications with SignalR and responsive interfaces using Knockout.js, jQuery, AJAX, and Bootstrap.

SELECTED INDEPENDENT PROJECTS

GlucoPlate AI

Personal project

AI recipe companion | Python, FastAPI, Pydantic, SQLAlchemy

- Build a recipe-generation and shopping application with structured API contracts, provider abstraction for GitHub Copilot SDK / Gemini, and local fallback generation.
- Implement recipe saving, ingredient normalization, product and store search, shopping carts, and route planning in a responsive PWA.

Web development & deployment tooling

Personal projects

WordPress / Divi and self-hosted applications

- Develop WordPress features for form-submission storage, service management, and application-specific access; assemble Divi pages through reusable JSON components.
- Use GitHub Actions, Podman, and Tailscale for branch-specific application deployments; apply coding assistants to implementation, debugging, and refactoring.

TECHNICAL SKILLS

Backend & data C#, .NET, ASP.NET Core, Blazor, Entity Framework / EF Core, SQL Server, REST APIs, SignalR

Frontend React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, WordPress / PHP

Delivery & security Git / GitHub, GitHub Actions, Docker / Podman, IIS, Auth0, role-based access, Serilog / Seq

AI development Python, FastAPI, Pydantic, GitHub Copilot, AI-assisted development
